

2 parts coming from belt conveyor

CCD Camera Detection - Product position

Detection data transfer - Digital alignment system

Auto product selection / pick up / loading by Robot

Programmable digital shuttle servo movement

Smart pick up / unloading by Robot

FEATURES

- Un-man pad printing operation with CCD vision + Product selection / pick up by Robot
- Special built KENT CCD vision + Scara robot for pad printing automation
- Work cell concept to automate complicate and labour intensive printing
- Low investment and high productivity
- Incorporate advance Green Pad Printing technology
- Auto pad clean
- Anti-dust enclose cabinet
- Independent PLC control
- Anti-statics pad
